## SUMMARY

AI engineer with production experience deploying LLM-powered systems and integrating AI APIs into existing client workflows. Shipped full-stack AI applications — RAG pipelines, agentic tutors, NLP APIs — bridging complex model behaviour and customer-facing solutions.

## EDUCATION

**Vellore Institute of Technology (VIT), Bhopal**

2022 – 2027 (Expected)

*Integrated M.Tech in Artificial Intelligence*

CGPA: 8.10

Coursework: Data Structures & Algorithms, Machine Learning, Deep Learning, NLP, DBMS, OOP

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript (ES6+), SQL

**AI / LLM:** LangChain, RAG Pipelines, Agentic AI, Prompt Engineering, Gemini API, Groq/LLaMA 3, HuggingFace Transformers, Sentence Transformers, ChromaDB, FAISS

**Backend & Frontend:** FastAPI, REST API, React, Next.js, Tailwind CSS, Streamlit

**Tools & Deployment:** Docker, Vercel, Render, Git/GitHub, Pandas, NumPy, spaCy

**Field Skills:** API integration, client workflow onboarding, production deployment, technical documentation

## EXPERIENCE

**CortexGiga**

Remote

*AI/ML Intern*

Jan 2026 – Mar 2026

- Integrated NLP pipelines (FastAPI + HuggingFace) into 3 client production workflows, cutting manual processing time by 40% via automated BERT-based text classification delivered as REST APIs.
- Fine-tuned and deployed transformer models with optimized inference (quantization + batching), improving throughput by 35% in client environments.
- Architected 4 async REST APIs (FastAPI + Pydantic) sustaining 100+ req/sec; wrote integration guides for client onboarding.

## PROJECTS

**Medical RAG Assistant** | *Python, FastAPI, LangChain, ChromaDB, Gemini API, HuggingFace, PyMuPDF* | [GitHub](#) 2025

- Built end-to-end RAG pipeline over a 173-page clinical handbook (532 semantic vectors, sub-second retrieval); exposed via FastAPI for client QA integration with zero hallucinations on in-corpus queries.
- Generated context-aware answers with page-level citations via Gemini API — production-ready for clinical knowledge workflows.

**Indian News Bias Detector** | *Python, FAISS, LangChain, Groq/LLaMA 3.3 70B, spaCy, Streamlit* | [GitHub](#) 2025

- NLP pipeline over 300+ articles (4 outlets, 15 topics) — VADER, TextBlob, spaCy NER for bias scoring; FAISS + LLaMA 3.3 70B generates grounded explanations visualized via Streamlit for non-technical stakeholders.

**DSA AI Coach** | *Next.js, TypeScript, FastAPI, Gemini API, Vercel, Render* | [GitHub](#) | [Live](#) 2025

- Deployed full-stack agentic AI tutoring platform (Next.js/Vercel + FastAPI/Render) to real end-users; Gemini API drives adaptive roadmaps from live learner performance data.
- Engineered Socratic hint delivery via prompt engineering — agent infers the user's approach and surfaces targeted hints over direct answers.

## CERTIFICATIONS & ACHIEVEMENTS

**Applied Machine Learning in Python** – University of Michigan (Coursera)    **Computer Vision** – VIT Bhopal (VITYarthi)

Solved **100+ DSA problems** on LeetCode / Codeforces: arrays, graphs, dynamic programming, trees

**Research Intern, Kanchan Children Welfare Society** – Field assessments across 5+ rural schools; findings shaped NGO programme planning and resource allocation
